

Tempe, Arizona, USA

November 20, 2024

Dear Hiring Manager,

I am writing to express my interest in the Software Development Intern position at TipTop Technologies. Currently pursuing a Master's degree in Software Engineering at Arizona State University, I am eager to apply my skills in software design, development, and Artificial Intelligence (AI) to contribute to your innovative MindWave AI platform.

Throughout my academic and professional journey, I have developed a strong foundation in both backend and frontend development, with hands-on experience in languages such as Python, JavaScript, and ReactJS, which are key to your internship role. At Western Union, I played a pivotal role in migrating a legacy POS system to a modern architecture with Angular 14, which improved revenue by 15

I am deeply passionate about the intersection of AI and software design, and I resonate with your company's vision of advancing general AI through continuous innovation. I am especially excited about the opportunity to work alongside a team that values creativity and individuality, qualities I strongly embrace. My ability to work independently, coupled with strong organizational skills and a collaborative mindset, will allow me to contribute effectively to TipTop's mission.

I look forward to the opportunity to further discuss how my technical skills and creative approach align with the goals of TipTop Technologies. Thank you for considering my application.

Sincerely,

Ashutosh Kumbhar
