**Hiring Manager**
Radian

Dear Hiring Manager,

I am writing to express my interest in the Software Engineering GenAI Summer Intern position at Radian. As a Master's student in Software Engineering at Arizona State University with a strong foundation in full-stack development, machine learning, and cloud technologies, I am eager to apply my skills and grow as a software engineer at Radian.

During my time at Western Union, I contributed to the development and maintenance of the POS retail application, utilizing technologies such as Angular 14, Java, and Docker to drive improvements that boosted developer efficiency by 70

In addition, I have developed AI-powered applications, such as a cryptocurrency tracker leveraging Firebase and Flutter, and have a strong interest in technologies like TensorFlow, PyTorch, and OpenAI. My experience with cloud platforms, including AWS and GCP, aligns well with Radian's cloud-based infrastructure.

Radian's commitment to diversity, innovation, and flexible work aligns with my values, and I am excited about the opportunity to contribute to impactful projects with the GenAI team. I am confident that my problem-solving skills, passion for AI, and ability to quickly adapt to new technologies will make me a strong asset to your team.

Thank you for considering my application. I look forward to the opportunity to further discuss how my skills can contribute to the success of Radian.

Sincerely,
Ashutosh Kumbhar
