Hiring Manager
Verint

Dear Hiring Manager,

I am excited to apply for the **Software Engineer Intern** position at Verint. As a Master's student in Software Engineering at Arizona State University with hands-on experience in **backend development, API frameworks, and enterprise software solutions**, I am eager to contribute to Verint's mission of delivering cutting-edge CX automation and workforce productivity solutions. My background in **Java, cloud infrastructure, and Agile development** aligns well with the role's objectives.

At **Western Union**, I played a pivotal role in developing and maintaining the **POS retail application**, ensuring seamless performance. I contributed to the migration of WUPOS from Apache Tapestry to **Angular 14**, improving user experience and driving a **15% increase in revenue**. Additionally, I developed a **POS Development Utility** that boosted developer efficiency by **70%**. My strong foundation in **Test-Driven Development (TDD)** using Playwright has enabled me to write maintainable, high-quality code.

Beyond backend development, I have extensive experience in **debugging, troubleshooting, and resolving software issues**. At **MindsClik Digital Solutions**, I deployed an entire **microservices infrastructure** on **Google Cloud Platform** using Kubernetes and optimized backend services with **Node.js and RESTful APIs**. Furthermore, my work on the **Online Compiler Web IDE** involved integrating **Docker, Kubernetes, and Redis** to enable seamless multi-language execution.

I am particularly drawn to Verint's focus on **enterprise application development, automation, and AI-driven solutions**. My proficiency in **Java, .NET, object-oriented design, and API development**, along with experience in **debugging, code reviews, and cross-functional team collaboration**, makes me a strong candidate for this role. Additionally, my ability to quickly adapt to new frameworks and methodologies aligns well with Verint's innovative and fast-paced environment.

I am eager to bring my **problem-solving skills, backend expertise, and software quality assurance experience** to Verint. I would welcome the opportunity to further discuss how my skills and experiences align with your team's goals. Thank you for your time and consideration.

Sincerely,
Ashutosh Kumbhar
